Section 1: Installation of Desktop GMIS application

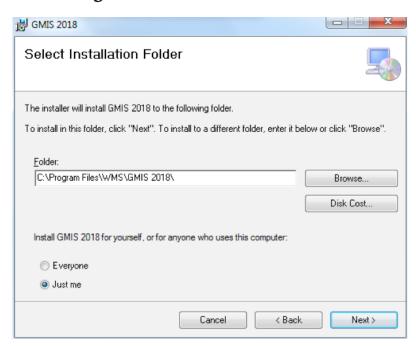

1. Double click setup.exe file in GMIS 2018 installation folder

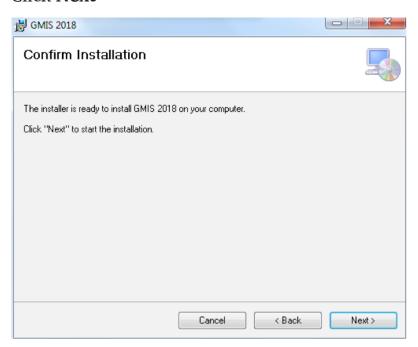

2. Click Next in subsequent pages

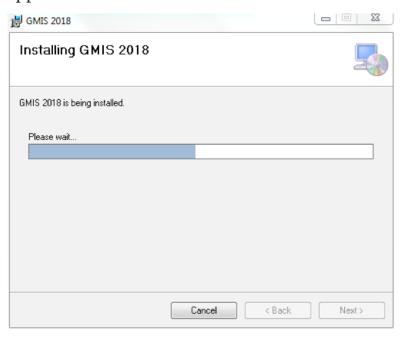

3. Select 'I agree' and Click Next.

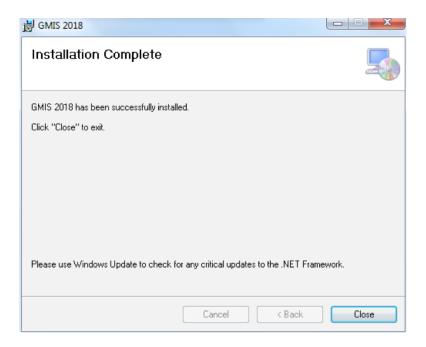

4. Click Next

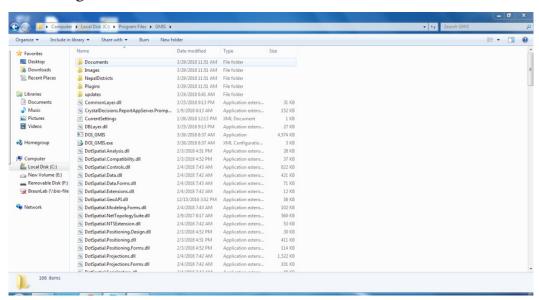

5. Please wait for a while, as installation may take some time. When installation is successfully complete, the following screen appears

6. Click **Close**.

7. Go to Program Files where GMIS is installed and verify following screen .

If there is no "Documents" Folder in Program Files create one . (Only for 64 bit systems) . Otherwise its already created .

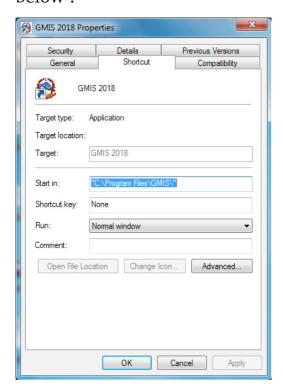

Note: 'Documents 'Folder must be present in Program Files not inside Program Files (x86) Folder.

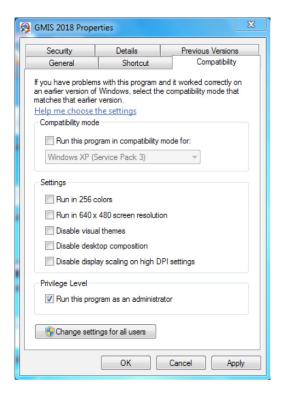

Configuration of 'CurrentSettings' File should be as follows .

```
| Settings.wm| | CurrentSettings.wm| | Curre
```

Verify the installation path for the program and the connection string . It may vary according to installation path . For 64 bit system it may be under Program Files (x86) Folder .

After installation be sure to choose "Run as administrator" as shown below. Click GMIS icon and change its properties as shown below.

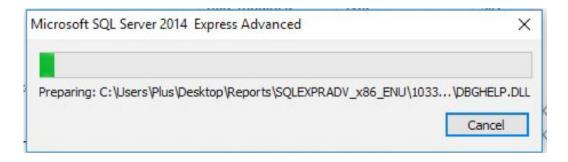

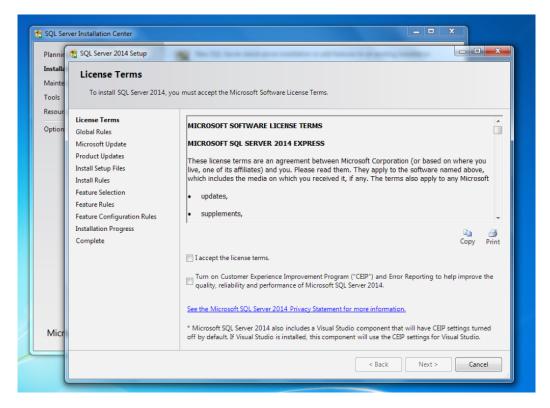

Click **Apply**.
